

Resources for Users

Let us help you get comfortable – even masterful – in your use of JMP®. Many of these resources are available online and at your convenience.

How do I learn JMP® and enhance my skills?

- Complete the learning road map in the [New User Welcome Kit](#), an interactive resource that helps you become comfortable with the basics of JMP – at your own pace.
- Watch a [Getting Started With JMP](#) webcast, a live introduction where you can ask questions and get answers right away.
- Next, attend [Mastering JMP](#) webcasts for users of all levels.
- Take part in the [JMP User Community](#), a one-stop shop for improving your JMP skills and connecting with other users.
- Subscribe to [JMP Newswire](#), the monthly newsletter on software updates, resources, tips and other information for users.
- Follow the timely and technical posts in the [JMP Blog](#).
- Hone your skills via the [JMP Learning Library](#).
- Take a live [JMP class](#) – in person or on the web. Also, sign up for self-paced JMP e-learning courses on [Data Exploration](#), [ANOVA and Regression](#) and [Classic Design of Experiments](#).
- Explore the [list of books](#) for JMP users.
- Stay connected via [social media](#).

How can I meet other JMP® users?

- [Join a local users group](#) to see how your peers are solving problems and find out about the latest JMP capabilities. No JMP users group nearby? [Contact us](#) to help you start one.
- Talk to other users online at [JMP Discussions](#), the [JMP Professional Network](#) on LinkedIn and the [Virtual JMP Users Group](#) on LinkedIn.
- Interact with users who share add-ins, sample data and scripts at the [JMP File Exchange](#), and submit your own.

ONLINE

Whom can I talk to about my business and technical needs?

Contact Technical Support at support@jmp.com or 919-677-8008.

Explore the [JMP Knowledge Base](#) for common problems and fixes.

Schedule an on-site presentation or WebEx with your account team.
